Education paltform (W4You)

Let's assume that we have an educational platform that wants to launch a branch in the Middle East and wants to know the statistics of the company that sells the most online courses in the Middle East **Udemy**

Targets:

- Best Selling Courses
- The most popular price category in which courses are sold
- The most popular courses that people pay for at Feedback
- Longest & Shortest Course Duration
- What time of the year the courses are sold
- The most popular level in which courses are sold

Requirements:

Answer all the previous questions and create an interactive dashboard.

Dataset:

Data Source : udemy_courses-raw.csv
